

Outdoor **MOTORIZED ZIP SCREEN**

Designed for outdoor entertainment areas such as pergola, balconies, zip screen are translucent but still protect your privacy, allowing you to reduce sunlight without having to give up the daylight. It prevents insects from entering the outdoor area and creates a multi-functional outdoor space.

PRODUCT FEATURES

◆ Enhance your outdoor space

Zip screen makes it easy to create a new living area in your home or effectively use your business space.

◆ Undisturbed use of daylight

Zip screens protect you or house furniture from direct sun radiation while still letting in natural daylight.

◆ Privacy at the push of a button

Zip screens protect your home from unwanted prying eyes. At the push of a button, you create the privacy you need at home, while still letting in natural daylight into your living area.

◆ Enhancement of energy balance

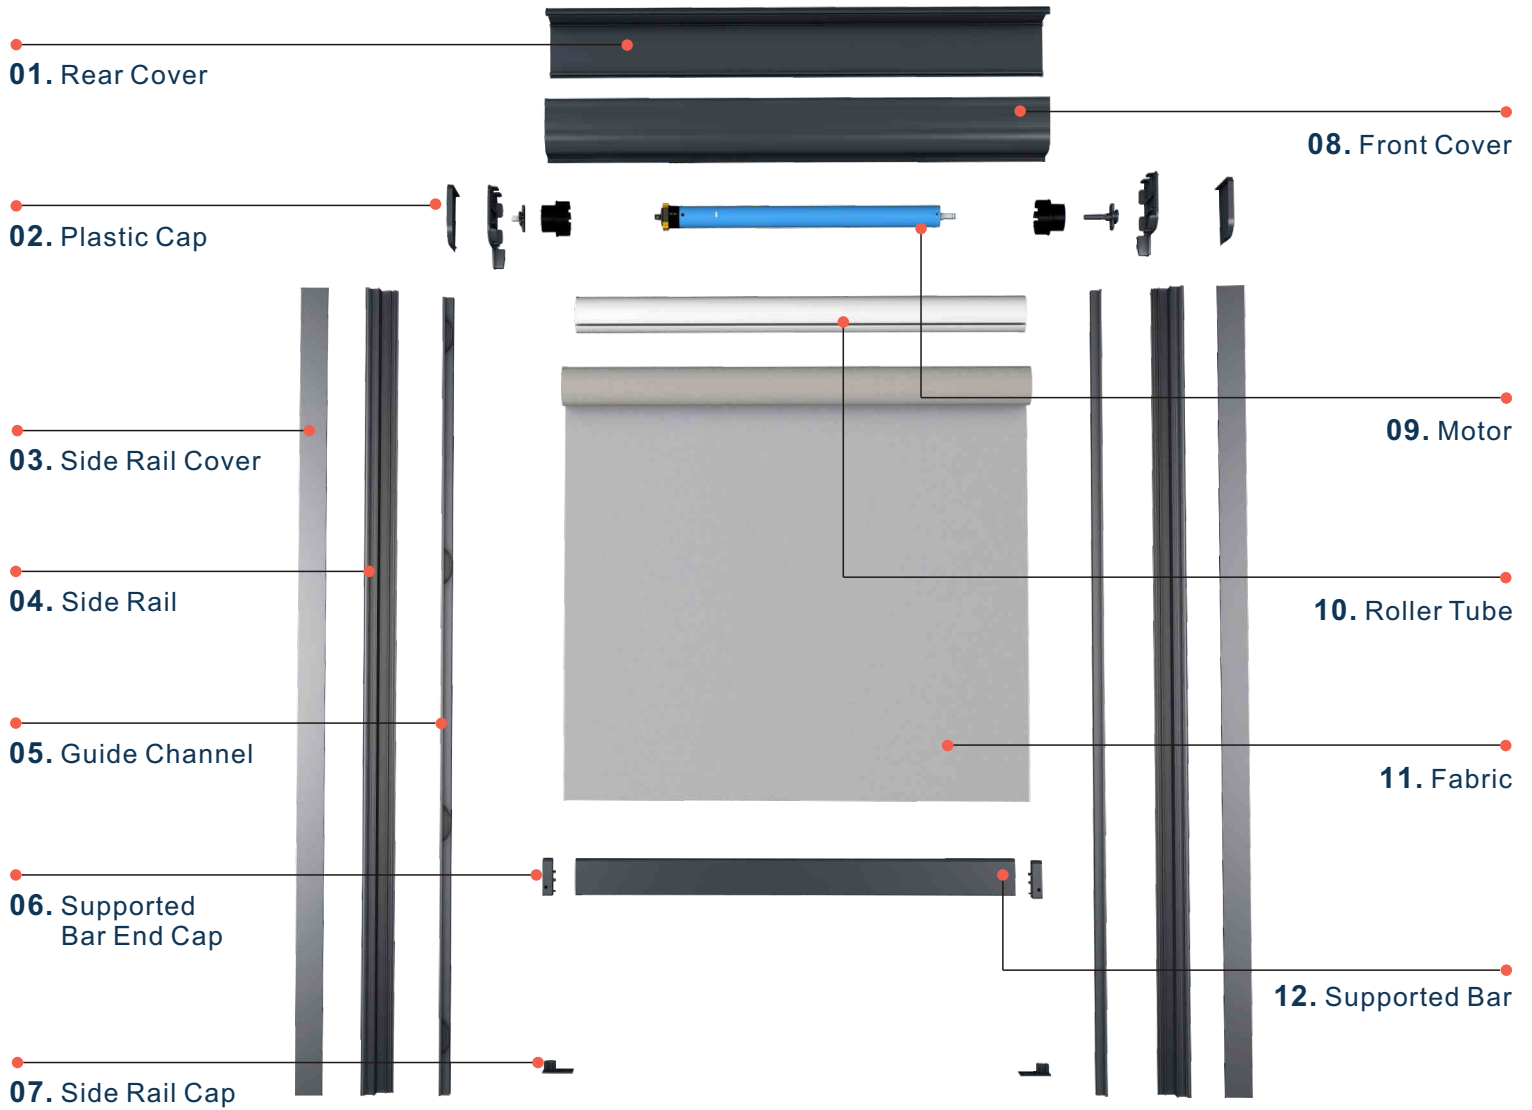

When zip screens are installed in front of the window, sliding door or balconies, Zip screens create an ideal room climate inside by absorbing the sun rays before they hit the glass.

◆ Preventing insects from entering the area

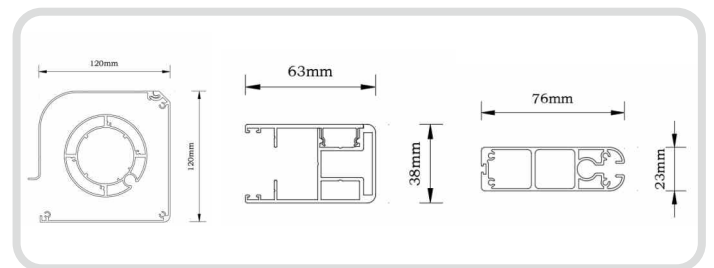

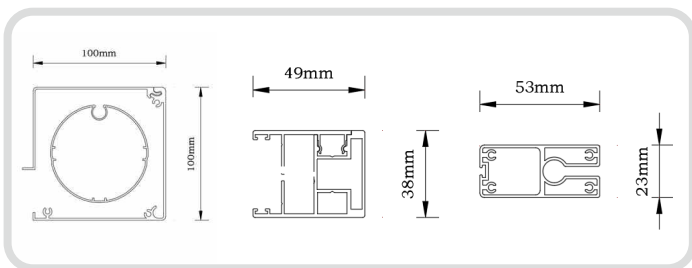

You don't need to worry about insect bites as no insects will be able to enter the closed area when the screens are pulled down.

Application

“Garden Patio”

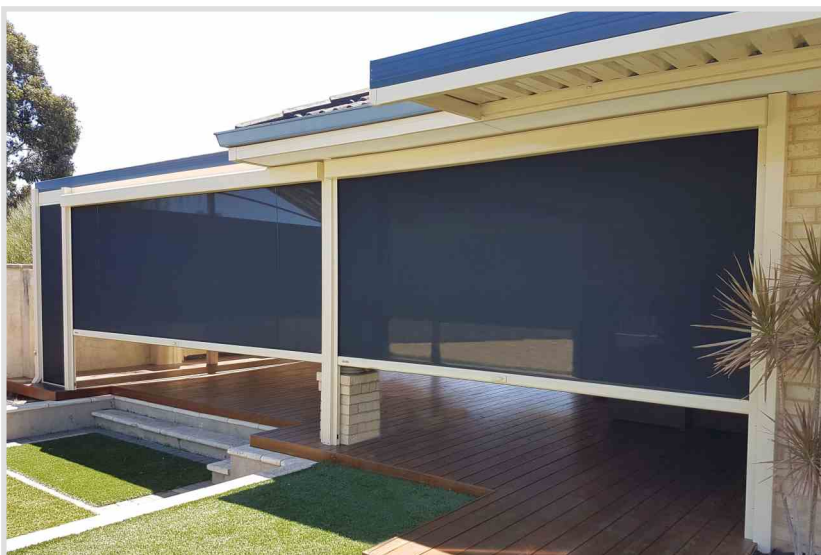

Roller blinds can provide a sunshade solution for the large opening patio area. It can offer a good shading effect while becoming an important part of buildings. What's more, it can attach to the louvered roof system pergola as another outdoor living room, expand your outdoor area.

“Balcony Leisure”

Zip screen can not only effectively protect the balcony from the harsh sunlight, strong wind, and rain, but it also can save space and remain the beautiful opening view. Make you enjoy the comfortable environment as well as the convenience that products brought.

“Window Area”

When you close the zip screen, it can change your opening garden into a safe and private space. The translucent roller blind system can remain a wide scenery and allow great air ventilation while avoiding mosquito in.
